Professional Profile

Service Designer with experience since 2021 in research, service design, and UX, in both consulting and companies in the financial, education, and delivery sectors.

I work from understanding the problem to defining the solution, connecting what users experience with how internal teams operate, and I support implementation so that what gets built stays consistent with what was discovered. To do this, I facilitate research and co-creation sessions with multidisciplinary teams and use generative AI to research, synthesize, and move from insight to action.

Habilidades

- Qualitative and quantitative research: interviews, fieldwork, surveys, focus groups, usability testing, and benchmarking.
- Design tools: journeys, experience and ecosystem maps, service blueprints, archetypes, JTBD, and information architecture.
- Facilitation: co-creation, ideation with multidisciplinary teams, and stakeholder alignment.
- End-to-end project delivery: from understanding the problem and discovery to defining and materializing solutions.

Education

2018 – 2023

Bachelor's in Design, emphasis in Communication and Product

Universidad de los Andes

Minor in Portuguese Language and Culture
Minor in Textiles

Universidad de los Andes

Work Experience

Ssr Service Designer

Monchis (itti digital, Grupo Vázquez) · Asunción, Paraguay

September 2025 – November 2026

Worked across the users, vendors, and drivers verticals on several initiatives per quarter, with impact on the customer-facing apps and internal back offices.

- Defined with 3 PMs the initiatives Service Design would support and, for each one, the work plan, timeline, and deliverables for the quarter.
- Conducted discoveries, strategy initiatives, and research (interviews, benchmarks, case mapping, and support flows) to identify improvement opportunities and design new experiences from scratch.
- Defined the new Discounts experience for users and internal teams with Product and Content Design, supported its implementation, and designed its internal launch. It shipped to production, along with Search improvements.
- Proposed the migration strategy for the vendor back office: mapped 20+ modules with 8 teams to decide what to keep, migrate, or rebuild, and proposed 3 migration scenarios based on impact, teams involved, and effort. Consolidated the information in a tool I built with Google AI Studio.
- With the Care & Comms Service Designer, mapped the AS-IS support flows for the 3 customer types and defined the TO-BE case management flows and rules in Salesforce, based on sessions with 30+ people.
- Built 5 user archetype hypotheses from previous research and desk research; the Data team validated 3 of them against a base of 39,000+ active users.

Service Design Consultant

Háptica · Bogotá, Colombia

March 2024 – August 2025

Worked on projects for clients in banking, insurance, telecommunications, and oil and gas, from diagnosis to solution definition.

- Diagnosed services and designed TO-BE journeys, service blueprints, and touchpoints such as service protocols, reports, and infographics.
- Designed the user research and co-creation tools for each project.
- Co-led, as a speaker with my manager, a Service Design Academy for a client, and mentored a team in the 2024 Legal Design Academy (20+ professionals).

UX Designer

La Clínica-ARQDIS, Universidad de los Andes · Bogotá

November 2024 – March 2025

Website redesign for the School of Medicine, working in a pair with a UX/UI designer.

- Designed and facilitated a workshop with faculty, students, alumni, and administrative staff to build the DNA of the digital strategy and prioritize the site's objectives by audience.
- Translated the strategy into Jobs To Be Done by user profile, with tactics and actions for the site.
- Led 5 co-creation and validation sessions with 50+ participants, plus usability testing, which shaped the information architecture, taxonomy, and final prototype.

UX/UI Designer, Banking Agents and ATMs

Banco de Bogotá · Bogotá, Colombia

April 2023 – September 2023

- Co-led research to enrich user profiles and coordinated 69 designers during fieldwork in branches and the call center.
- Identified friction points and usability improvements for the banking agent platform with users and clients.

Jr. UX Analyst

Skandia Pensiones y Cesantías · Bogotá, Colombia

July 2021 – January 2022

- Planned and conducted qualitative research and user testing on digital financial products, complemented with quantitative data.
- Synthesized findings into action plans for different teams and updated the company's user profiles.

Consulting and Independent Projects

Research Consultant
ELMNTL y Facultad de Administración, Universidad de los Andes

November 2022 – September 2023

Two research projects for the School of Management.

- Online master's programs (Nov 2022 – Feb 2023): interviewed internal and external stakeholders and systematized the information to understand the service and its current customer journey, as a basis for rethinking the programs.
- Service center (Jul – Sep 2023): analyzed interviews, surveys, and focus groups to produce findings, insights, and action plans on its organization.

Co-creation Facilitator

Facultad de Administración, Universidad de los Andes y JEP

September 2022 – November 2022

Workshops led by the Schools of Management and of Architecture and Design with staff from the Special Jurisdiction for Peace (JEP).

- Supported and facilitated co-creation workshops to assess and implement interventions that would improve the work dynamics of this transitional justice body, guiding sessions with design tools.

Research Consultant

Oh My Dog · La Calera, Colombia

February 2022 – March 2022

Project to create a new dog training, daycare, and boarding service.

- Led the research, analysis, and conceptualization of the service: benchmarking, state of the art, interviews, and value proposition.
- Built user profiles and the customer journey, which informed decisions on consolidating the service.

Teaching

Teaching Assistant, Studio 4: Clinic
School of Architecture and Design, Universidad de los Andes

August 2022 – December 2022

Supported faculty and students on projects for internal and external university clients, using research tools to analyze, conceptualize, and develop proposals aligned with each brief.

Teaching Assistant, Service Design
School of Architecture and Design, Universidad de los Andes

January 2022 – May 2022

Supported the course and students in understanding a service and proposing an improvement, applying design thinking with theoretical and practical tools at each stage.
